ANGLICAN COLLEGE

## Overview

Trinity Anglican College operates a bring-your-own-device (BYOD) program, which means all senior students at Trinity Anglican College require access to a laptop to use as a learning tool. While here, the laptops connect to the College's wireless network to allow students access to resources they need for learning. The program is not about using a computer all day long, but rather to augment your child's lessons and learning style.

## Do we have an IT Service Desk?

The IT Service Desk is located in the Library and is staffed during school hours. If your child needs assistance with anything computer-related they should come to the IT Service Desk with their computer. We can help with almost any IT-related questions.

## What do I need to know if I want to buy a different laptop?

To have a good experience at Trinity Anglican College the student laptops need to meet our minimum requirements. The IT Staff have experimented with the required student software and decided on the following minimum specifications:

- Processor: Intel i5 quad-core
- Memory: 8GB
- Storage: 256GB solid-state drive
- Wi-Fi: 5GHz 802.11ac **must** be supported
- Operating System: Windows 10 or macOS X Catalina
- Warranty: extend to three years wherever possible
- Battery: minimum of 6 hours runtime

If you take these specifications to a retailer such as JB Hi-Fi, The Good Guys, Officeworks, etc. a salesperson will be able to show you a suitable laptop.

## **The College provides all necessary software**

Trinity provides all the software your child needs, and creates access to online tools as required. As such, you don't need to buy any additional software at all.

We'll provide your child with:

- A school email address
- Office 365 and OneDrive
- Adobe Photoshop, Lightroom, Premiere, and other packages as needed
- A school Google Drive account
- Malwarebytes anti-malware
- PaperCut Mobility Print

## **The BYOD Portals.**

The College has engaged with JB Hifi and Dell to offer some models that meet our recommended specifications. These models on offer come with a discount, but of course you can shop around.

To access the offers please click on the links below and follow the instructions
